

Kirk Mettam, PE
Member At-large

Kirk Mettam joined Silman in 1998 and has been involved in the practice of structural engineering and architecture throughout his professional career of 35 years. Kirk's experience extends to a wide variety of structure types including high-rise office buildings, headquarters, retail and mixed-use developments, educational and academic, hotels, airports, bridges, sports facilities, as well as historic structures ranging from heritage buildings of unique archaic construction, to Mid-Century Modern architectural landmarks. He has maintained an active participation in the industry through his involvement with national committees and technical publications.
